# Zomato Delivery Performance Analysis

Data-Driven Insights & Strategic Recommendations

Made with GAMMA

# Top 10 Key Insights

01

## Peak Hour Traffic

9 PM peak with 4,686 orders — highest delivery partner demand

02

## Weather Impact

Fog: 29.28 min avg vs. Sunny: 20.33 min — 30–40% degradation in bad weather

03

## Geographic Concentration

76.81% of orders from metro areas; semi-urban only 0.36%

04

## Customer Satisfaction

Overall rating 4.63/5.0 — 0.27 pts below industry benchmark of 4.7+

05

## Delivery Speed

31% of deliveries (20,721) are slow (>35 min) — nearly 1 in 3 delayed

Made with GAMMA

# Critical Performance Gaps

### 🎉 Festival Crisis

45.52 min avg during festivals vs. 25.98 min normally — **75% slower**

### 📅 Monthly Swings

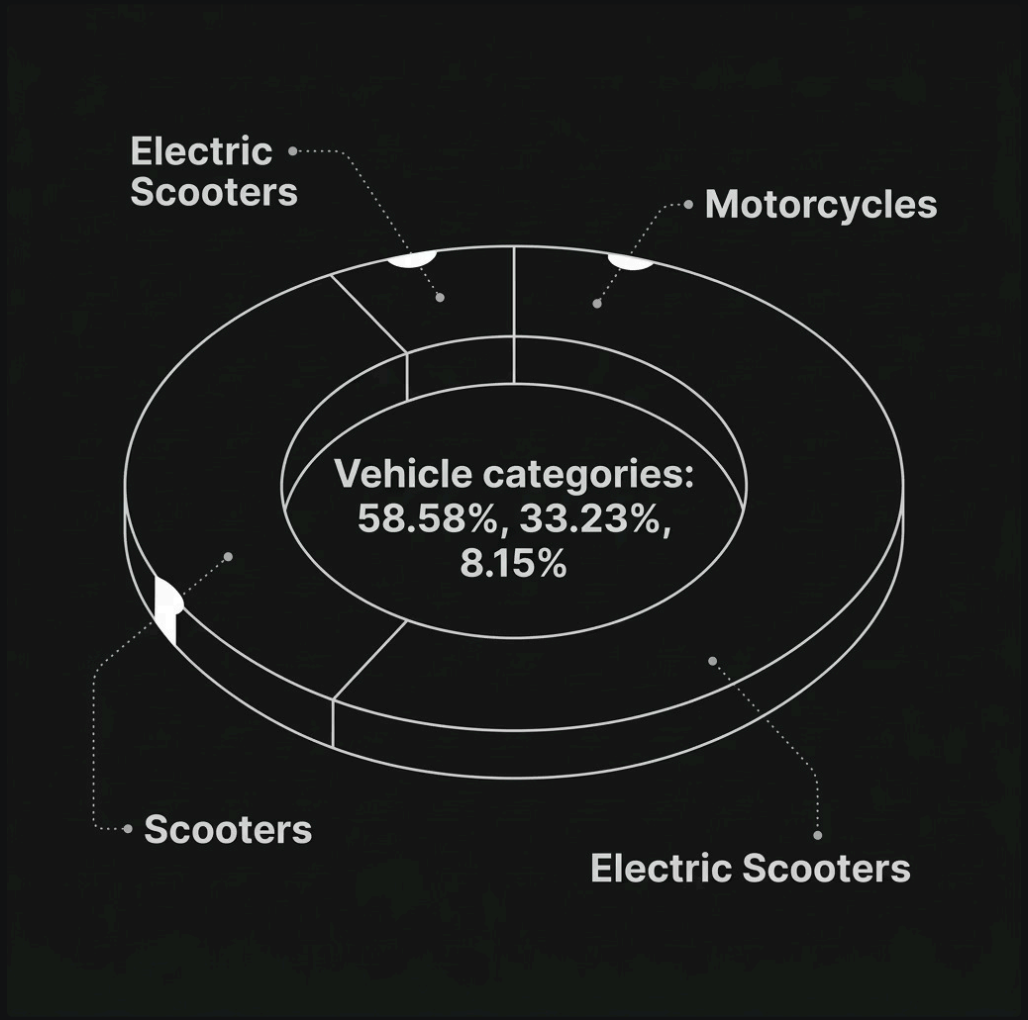
March peak: 31,989 orders vs. April low: 6,362 — poor resource allocation

### 🚦 Traffic Impact

High traffic zones: 40 min avg — **2x** longer than medium traffic areas

Made with GAMMA

# Fleet & Route Insights



## Vehicle Mix

Motorcycles dominate at **58.58%**, while electric scooters remain low at just **8.15%** — a significant green opportunity.

## Route Inconsistency

At the most common distance (13.03 miles), delivery times range from **20–46 minutes** — high variance signals route optimization problems.

# Top 10 Strategic Recommendations

1

### Weather-Based Ops

+30% partner availability in bad weather; ₹20–50 weather bonus per delivery

2

### Peak Hour Surge

"Evening Warrior" program — 1.5x pay for 7–10 PM; predictive scheduling

3

### Geographic Expansion

Pilot 5 semi-urban locations; partner with tier-2 city restaurants

4

### Festival Preparedness

Hire 50% temp partners 2 weeks before festivals; "Festival Fast Track" premium tier

Made with GAMMA

# Technology & Operations Recommendations

## AI Route Optimization

Deploy AI routing + Google Maps API integration.
**Expected: 15–20% reduction** in avg delivery time.

## Partner Excellence Program

Monthly ₹5,000 bonus for top 10%; service training.
**Target: 4.63 → 4.75+ rating.**

## EV Fleet Expansion

₹30,000 EV subsidy; target 30% EV fleet in 12 months.
**Expected: 40% cost reduction.**

## Traffic Zone Strategy

Micro-fulfillment centers + relay delivery in congested zones. **Expected: 25% faster delivery.**

## Customer Communication

Real-time GPS tracking + proactive SMS/WhatsApp delay alerts. **Expected: 30% fewer complaints.**

## Data-Driven Planning

Predictive demand models + real-time KPI dashboard.
**Expected: 15% cost optimization.**

# Implementation Priority Matrix

### Short Term (1-3m)

Route optimization, excellence program, traffic strategies.

### Medium Term (3-6m)

Festival preparedness and data-driven planning.

### Immediate (0-30d)

Weather ops, peak hour mgmt, customer comms.

### Long Term (6-12m)

Geographic expansion and EV fleet expansion.

Prioritization balances quick wins with structural investments — early actions build the foundation for long-term transformation.

# Projected Outcomes: 12 Months

**25%**

**Faster Delivery**

26.48 min → 20 min avg

**4.80**

**Target Rating**

Up from 4.63 today

**32%**

**Order Growth**

41,648K → 55,000K orders

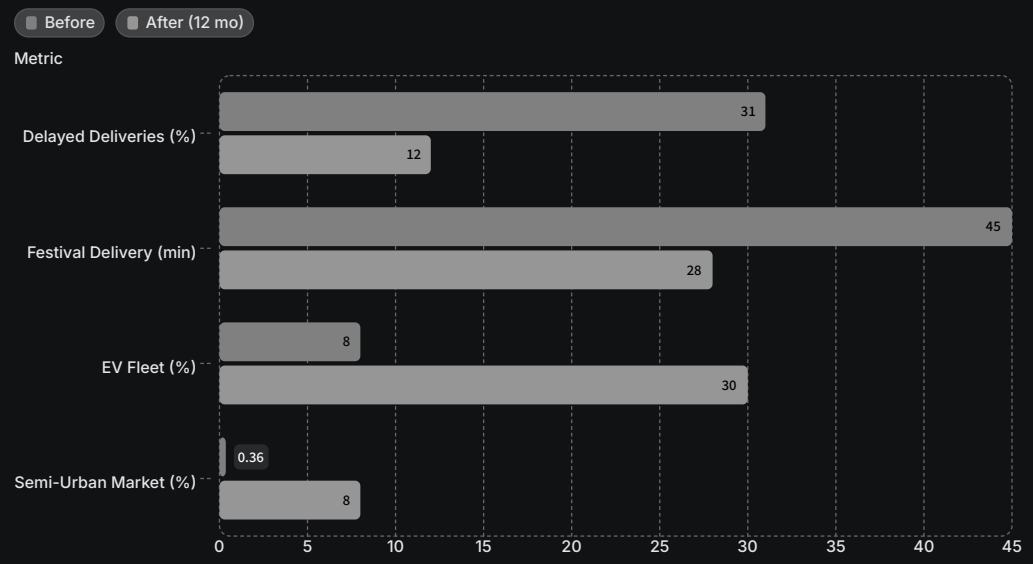
**20%**

**Cost Reduction**

₹40 → ₹32 per delivery

Made with GAMMA

# More Projected Wins



## Transformation at Scale

Delayed deliveries drop from **31% → 12%**. Festival performance improves **38%**. Semi-urban market grows **22x**. EV fleet nearly **quadruples** to 30%.

These projections assume full implementation of all 10 strategic recommendations within the 12-month roadmap.

# The Path Forward

Zomato's delivery network has strong foundations — but data reveals clear gaps in weather resilience, festival readiness, and geographic reach. Executing this roadmap will drive a **25% speed improvement, 32% order growth, and 20% cost reduction** within 12 months.

## Act Now

Weather ops, peak surge & customer comms

## Build Systems

AI routing, EV fleet & partner excellence

## Scale Up

New markets, festival prep & data planning
